Partnership

Microwave Filter Company

Microwave Filter Company, Inc. (MFC) is a leader in the design, development and manufacture of high quality filter products since 1967.

Our team will be working hand in hand with your staff to provide quality and timely:

- Design
- Prototyping
- Drawings
- Specification
- Support and Customer Service

DH Satellite

DH Satellite is a leader in satellite antenna technology. Our antennas are reliable, functional, and adaptable to numerous applications. We ship all over the world for a wide variety of uses. We are confident you will be happy with the service from DH Satellite! Contact us, we can serve you!

Skyline Communications

Skyline Communications, Inc has been in business since 1991 providing national telecommunications services such as primary and backup satellite internet connectivity, structured cabling, and managed Wifi Systems to the broadcast television, disaster recovery, and commercial market.

Microwave Filter Company's

EXECUTIVE SUMMARY

Microwave Filter Company, Inc. (MFC) is a leader in the design, development and manufacture of high quality filter products since 1967.

The facility is equipped with an impressive complement of analytical and design software, test instrumentation, prototype and manufacturing equipment to create passive filters, components and subsystems.

The Manufacturing Facility

Includes:

- State-of-the-Art CAD-CAM system
- A test department with automated network analyzers to 50 GHz
- A high capacity conveyor soldering oven
- A coating/finishing operation
- A fully compliant TQM/ISO9000 based quality assurance program to insure the intrinsic quality of the products produced.

All MFC filters are produced within our modern 40,000 square foot facility by a staff that is "Committed to Excellence".

MFC Also Offers:

- Interference Filters for C-Band installations, including 5G, Satellite & Wireless.
- Our Team has been involved in a number of programs serving:
 - Communications
 - Broadcast and CATV operators and installers
 - Military/Aerospace facilities
 - Universities and Government research labs
 - Wireless cable multi-channel, multi-point manufacturers, and Distribution Systems
 - C-band and Ku-band satellite Systems
 - A Complete Line of CATV headend channel deletion filters and networks, bandpass filters and diplexers for wireless and PCS applications.

DH Satellite

EXECUTIVE SUMMARY

Performance & Durability

Our antennas are used all over the world in a wide variety of conditions, from extreme landscapes to hurricane force winds. Having produced over a half-million antennas, DH Satellite has the experience and track record to ensure your satellite mount and antenna needs are met. Based in Prairie du Chien, Wisconsin, DH Satellite proudly serves the U.S. and the world.

Antenna Solutions & Installation

DH Satellite manufactures solid, stable, and dynamic satellite mounts that are useful for a variety of situations. From our standard fixed mounts, to our dual powered mounts that are wind load rated up to 194 mph.

Shipping & Logistics

Sectional antennas ship common carrier within a few days at a very low cost. Custom crating is available for shipment. International shipments are ISPM 15 compliant! LCL or container shipping available for export shipments

The Right Antenna & Mount For You!

With a variety of antenna sizes and mount types we are confident we have the right solution for you. Call us and discover more!

Which option is best?

The most important fact to understand is that there is no difference between our one piece antenna and the sectional antenna when it comes to performance. Technical specifications are the same with a few exceptions such as antenna weight and additional structural ribs for assembly of the sectional antenna.

Regardless of the site, a DH Sectional antenna is a good fit for your antenna needs and is our first recommendation for your project.
